

**[0088]** A genetic health data management system and method is provided. Specifically, the invention relates to a method, system, and computer program for collecting genetic screening and demographic data from clients, storing clients' data and DNA/genetic material samples, processing and analyzing genetic testing data in conjunction with other relevant health data, generating custom reports, maintaining life-long health records and pre-populating data into user accessible personal health records.

1. The first of these is the fact that the  
 2. Government has been unable to secure  
 3. the necessary funds to carry out its  
 4. policy of non-interference in the  
 5. internal affairs of the country. This  
 6. has been due to a variety of causes,  
 7. including the fact that the Government  
 8. has been unable to secure the necessary  
 9. funds to carry out its policy of non-  
 10. interference in the internal affairs of  
 11. the country. This has been due to a  
 12. variety of causes, including the fact  
 13. that the Government has been unable  
 14. to secure the necessary funds to carry  
 15. out its policy of non-interference in  
 16. the internal affairs of the country.
